DETAILED ACTION

Specification

1. Throughout the specification there are squares instead of the Greek letter " ρ ". A substitute specification would probably be the best way to address this problem, due to the great number of instances.

Allowable Subject Matter

2. Claims 1-22 are allowed. The closest prior art is Smith et al. (US 6,315,707); however, this reference fails to disclose "said peripheral separation channel is disposed in fluid communication with said fluid inlet channel in said central section of said separation channel", in combination with the remaining limitations of the independent claim.

Conclusion

3. This application is in condition for allowance except for the above formal matters. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
